

RegDBOnline

Online source of regulatory information for chemical substances

SAVE TIME AND MINIMIZE RISKS ASSOCIATED WITH REGULATED CHEMICAL SUBSTANCES FROM A SINGLE MANAGED SOURCE

BENEFITS

- Ensure products can be sold into current or new markets
- Provide access to regulatory information to colleagues beyond EHS
- Gain insight on regulatory restrictions, labeling requirements, export notifications, and inventory reporting
- Keep up to date with individual country GHS classifications and REACH registrations
- Comply with transport legislations for the storage, use and transport of dangerous goods
- Support your SDS production

In a constantly changing and evolving regulatory landscape, it is essential to have access to key regulatory data in order to ensure your business can thrive and expand.

Sphera's RegDBOnline® is a comprehensive online regulatory database for Environment, Health, Safety (EHS) and Transport information for chemical substances. With an intuitive, easy to use interface and built-in search engine, RegDBOnline enables you to quickly access information for more than 300,000 chemical substances.

RegDBOnline eases the burden of consolidating regulatory information on a global scale and significantly reduces the complexity by providing one centralized source for both government and industry guidelines. With content covering more than 50 countries, the managed regulatory content provided supports companies with global operations to assess marketability and address legal obligations proactively.

Having access to up to date information is critical to supporting your business decisions. Each regulatory list provided in RegDBOnline is monitored and updated on a regular basis to ensure the most current and accurate information is available.

Inconsistencies and gaps in published regulations often add to the effort required to find and analyze the correct information. RegDBOnline enables better decision making by supplementing published regulatory information with expert value added data. Additionally, it facilitates research by offering extensive translations of phrases, terms and substances and offering a simple concise view into all legislative data.

RegDBOnline is part of the comprehensive Product Stewardship solution that supports your product compliance and stewardship processes from end-to-end.

Quarterly Data Updates Wide Range of Regulatory Data

- National Inventories
TSCA, AICS, KECI, DSL etc.
- Occupational Exposure Limits
OSHA, NIOSH, EU etc.
- Transport
IMDG, IATA etc.
- Health
WHMIS, IARC, ISHA etc.
- Country Specific
TSCA, CFRs, OELs, WGK etc.
- Industry Specific
FDA, IFRA, CEPE, GADSL
- Chemical Control
REACH, Biocides, CEPA etc.
- Environmental
Montreal Protocol, UNEP,
Clean Air Act, etc.
- Substance Toxicity data
RTECS, AQUIRE etc.

With RegDBOnline you can...

Improve the efficiency of your research

- Leverage flexible search capabilities to quickly filter through hundreds of regulations and pinpoint the chemical substance data most relevant to your needs. Searches can be easily created or combined based on any number of criteria such as geographic areas, regulation type, chemical names or standard identifiers such as CAS and inventory numbers.
- Reduce the requirement of researching and then consolidating information from many different regulatory websites or other sources. RegDBOnline provides a consolidated view of chemical regulatory data such as classifications, thresholds and restrictions from one source.

Stay current and compliant with hundreds of regulatory lists around the globe

- Decrease the burden of identifying changes. RegDBOnline has a continuous monitoring process and content is updated by our experts as changes are made by regulatory authorities. These changes are easily identified through features such as update and effective date search functionality.
- The content provided is regularly expanded to cover new regulatory lists such as emerging national inventories, country specific GHS classification and more.

Get access to information beyond regulations

- Gain additional insights on chemical compounds by accessing information provided by Sphera experts. They systematically assign specific substances to groups of chemicals (e.g.: Cadmium compounds), saving you time and effort.

Provide Corporate-wide access to a single trusted source

- By virtue of online access, your regulatory affairs, R&D, procurement, industrial hygiene or product compliance departments will all have access to a common and up-to-date knowledge base providing consistent information.
